

SALE OF BOSS TWEED

Another Important Mining Deal Consummated Yesterday.

A CONTROLLING INTEREST

PURCHASED BY W. E. HUBBARD AND OTHERS.

On Basis of \$80,000 For the Mine—Property Adjoins the Star Consolidated—Extensive Work to Be Done, Including Pipe Line Between Mill and Mine.

Yesterday another transfer of valuable Utah mining property was consummated. A deal was closed whereby a controlling interest in the Ross Tweed at Tintic becomes the property of new owners.

The purchasers are W. E. Hubbard, W. T. Dwyer and W. J. Lawrence, the well-known mining men of this city, who are also large holders in the Star Consolidated, which adjoins the property.

The gentlemen, when seen by a representative of The Herald last evening, were not disposed to disclose the price they are to pay for the stock, but a party who claims to be on the inside, and knows all about the transaction, is authority for the statement that the stock goes for at least 10 cents a share for the control, or at the rate of \$80,000 for the entire property. The stock has been selling on the exchanges for 20 and 25 cents per share.

The property is already a shipper, and some very fine copper ore has been marketed, which averaged 15 and 17 per cent. besides the values it carries in gold and silver.

The shaft on the ground is down to a depth of 125 feet. It is the intention of the new owners to straighten the old shaft, and to first-class condition and sink it 50 or 200 additional feet.

Mr. Hubbard states that by the time the shaft is put in good condition the company will be able to ship at least a carload of ore a week to the market. Mr. Lawrence has just returned from making an inspection of the property, and states that there is a fine showing of ore on every level, and there is no question but the mine will soon become a great producer.

The property consists of two claims, which lie on the vein which extends through the Star Consolidated and Carnegie and the southeast of the Ajax and Mammoth.

The control of the property was secured from William Royal and Seth Louisaugh.

While in Tintic, Mr. Lawrence visited the Star Consolidated, which, he says, is in a most excellent condition. The shaft is now down to the 500 level, and it is the intention of the company to continue sinking to the 700, where it is probable some drifting will be done.

A mine is now down to the 500 level and is now down about fifty feet on a body of ore. Thirty-five men are employed in the mine.

The company is also building a pipe line between the Mammoth mill and the mine. The pipe being laid is two and one-half inches in diameter, and will be sufficiently large to supply the mill with water from the mine, and with a plentiful supply of water. The pipe line will be completed within thirty days. A force of fifteen men is now at work in pushing the work as fast as possible.

THE COPPER RANCH.
A Strike in That Promising Beaver County Property.

Manager A. Murphy of the Copper Ranch Mining company, located in the Rocky district in Beaver county, returned from the mine yesterday and brought with him some fine samples of copper ore.

The Copper Ranch is owned principally by Gill E. Poston and his partners, associates, and from the reports Mr. Murphy brings with him it promises to develop into a great mine.

A few weeks ago Mr. Murphy began sinking a new shaft on the opposite side of the ledge from the old workings, and in his explorations he has exposed a vein of copper-bearing ore which is about thirty feet in width.

The new workings are in a true fissure vein which lies between walls of granite and the exposed, he states, is thoroughly impregnated with copper sulphides, and also carries good values in gold and silver.

Mr. Murphy is very enthusiastic over his recent strike in the Copper Ranch. He also speaks in glowing terms of the future of the Rocky as well as of the Beaver Lake district, which adjoins it on the west.

The showing of copper ore in these two districts is simply wonderful, and Mr. Murphy does not hesitate to say that it is only a question of a little time before that part of the country will become one of Utah's greatest mining camps.

With the application of a little capital and energetic development work, there are a number of properties in the two districts named that are certain to become big mines.

While in the city Mr. Murphy will arrange for the shipment of a new

which, which will be used to sink the shaft to a depth of 300 feet.

Mr. Murphy also reports that an important strike has been made in the old Rollins mine, which is now known as the Lincoln mine. A four-foot body of high-grade ore has been opened up, and the company is preparing to commence regular shipments of ore. The Lincoln mine is owned principally by capitalists residing at Lincoln, Ills. The property is being managed by Mr. John P. Mundy, also of Lincoln, Ills., who has his family at the mine and is personally conducting the work.

Water has been one of the most disturbing elements, and Mr. Mundy has recently installed some of the latest pumping machinery.

Mr. Murphy also reports the information that the Old Cave mine, in the Bradshaw district, which has nested its former owners many thousands of dollars, is now shipping regularly.

The entire output of the Monitor, in the Star district, is being shipped to the Kansas City mill. The mine is also being worked and is said to look encouraging. The Star district is contiguous to the Beaver Lake and Rocky districts.

BIG PARK CITY DEAL.

Gold Property to Be Purchased by Massachusetts Company.

William M. Curtis, Thunders property at Park City will be purchased by and become part of the Massachusetts company's holdings in the Park. The transfer of this valuable ground will be made by Mr. Curtis to the company during the next few days, and though the price is not given publicly, it will undoubtedly require five figures to express it.

The ground adjoins the Massachusetts on the east and up to this time little information has been given out regarding it.

Mr. Curtis, who seems, the Thunders is a straight gold proposition and contains a strong ledge with several feet of ore that averages 80 to the ton.

The development of the great depth, but as the shaft on the Massachusetts is in close proximity to the claim the gold vein can be developed through it by running a drift some 200 feet. Experts declare the gold ledge in the Thunders to be identical with the vein that traverses the Silver King property, and another ledge in the latter ground only averages 112 or 114, the former, they say, carries the cream.

Within the next week or two Mr. Curtis, as superintendent of the Massachusetts property, will leave for the Park and commence an active campaign of development, which, among other things, contemplates a new shaft, and states that there is a fine showing of ore on every level, and there is no question but the mine will soon become a great producer.

The property consists of two claims, which lie on the vein which extends through the Star Consolidated and Carnegie and the southeast of the Ajax and Mammoth.

The control of the property was secured from William Royal and Seth Louisaugh.

While in Tintic, Mr. Lawrence visited the Star Consolidated, which, he says, is in a most excellent condition. The shaft is now down to the 500 level, and it is the intention of the company to continue sinking to the 700, where it is probable some drifting will be done.

A mine is now down to the 500 level and is now down about fifty feet on a body of ore. Thirty-five men are employed in the mine.

The company is also building a pipe line between the Mammoth mill and the mine. The pipe being laid is two and one-half inches in diameter, and will be sufficiently large to supply the mill with water from the mine, and with a plentiful supply of water. The pipe line will be completed within thirty days. A force of fifteen men is now at work in pushing the work as fast as possible.

THE COPPER RANCH.
A Strike in That Promising Beaver County Property.

Manager A. Murphy of the Copper Ranch Mining company, located in the Rocky district in Beaver county, returned from the mine yesterday and brought with him some fine samples of copper ore.

The Copper Ranch is owned principally by Gill E. Poston and his partners, associates, and from the reports Mr. Murphy brings with him it promises to develop into a great mine.

A few weeks ago Mr. Murphy began sinking a new shaft on the opposite side of the ledge from the old workings, and in his explorations he has exposed a vein of copper-bearing ore which is about thirty feet in width.

The new workings are in a true fissure vein which lies between walls of granite and the exposed, he states, is thoroughly impregnated with copper sulphides, and also carries good values in gold and silver.

Mr. Murphy is very enthusiastic over his recent strike in the Copper Ranch. He also speaks in glowing terms of the future of the Rocky as well as of the Beaver Lake district, which adjoins it on the west.

The showing of copper ore in these two districts is simply wonderful, and Mr. Murphy does not hesitate to say that it is only a question of a little time before that part of the country will become one of Utah's greatest mining camps.

With the application of a little capital and energetic development work, there are a number of properties in the two districts named that are certain to become big mines.

While in the city Mr. Murphy will arrange for the shipment of a new

the Daisy. A new steam hoist is to be erected as soon as water can be piped down from the Daisy. It is the intention to continue sinking as far as the footwall, and then it is proposed to drift. A second shaft is to be put down near the south end of the claims to demonstrate the value of the vein in that locality. Surveyors are on the ground preparatory to securing a patent.

TINTIC MINES ATTACHED.

Papers Served On Alaska and Cornucopia Properties.

(Special Correspondence.)
Mammoth, April 21.—Deputy Sheriff Dan Cronin of Forks today served a writ of attachment on the Alaska Mining company's properties, and a writ of execution on the Cornucopia mine, the latter being returnable May 15. The Alaska group comprises the Storm, Storm No. 2, East Alaska and North Alaska. The Cornucopia is one of the Treasure Hill group of mines, but is said to have been worked separately or by independent management. The Cornucopia management is said to have incurred a large indebtedness, and to have been unable to pay the same.

Mr. Hecney stated yesterday that when work was suspended a fine body of ore was in sight and predicted that the company would be shipping ore within sixty days. The property is now being worked, and it is understood that Mr. Samuel McIntyre will have the management of the mine, in which he is a heavy stockholder.

TO WORK THE HERCULES.
(Special Correspondence.)
The Hercules Mining company, in which James Hecney is the chief stockholder, will resume work on the property in the near future. The mine, which is known upon all mining maps of the Tintic district as the Phoenix mine, is said to have been worked since 1885. Almost since the formation of the company the property has been in litigation, which has only been settled within the last few months. A force will be put to work at once to resume the underground workings, after which development work will be pushed with a will.

Mr. Hecney stated yesterday that when work was suspended a fine body of ore was in sight and predicted that the company would be shipping ore within sixty days. The property is now being worked, and it is understood that Mr. Samuel McIntyre will have the management of the mine, in which he is a heavy stockholder.

FAITH IN NORTH SWANSEA.
(Special Correspondence.)
Pat Condon inspecting this promising Tintic property.

Mammoth, April 21.—Pat Condon, whose name is a veritable household word in every mining camp in Utah, and more especially in this particular section, arrived here today, having driven from Salt Lake. Mr. Condon is extensively interested in the Euraka-Swansea Extension, North Swansea, Central Mammoth and a series of prospects of more or less notoriety. He comes to Tintic just now to determine whether it will be advisable to continue prospecting work in the North Swansea on the lines carried on for some time, or whether the ground indicates the wisdom of completely changing the plans mapped out. Mr. Condon pins his faith on the outcome of the North Swansea.

NORTH FORK PLACER.
(Special Correspondence.)
The directors of the North Fork Placer Mining company have held a meeting and elected the following officers for the ensuing year: R. H. O'Connell, president; E. G. Kogon, secretary and treasurer; and Ed Scott, general manager.

The company owns property in Trinity county, California, consisting of 40 acres.

Manager Scott is now in California, looking after the company's interests. A recent letter from him states that there is an abundance of water this year, and he is engaged in putting in a flume and hydropower machinery to an early resumption of work.

SOUTH SWANSEA WORKINGS.
(Special Correspondence.)
Silver City, Utah, April 21.—The South Swansea people, finding themselves wholly unable to continue the use of the incline shaft to advantage any longer, have decided to commence work about May 1 on a new incline shaft. For some time it has been manifest to Manager Wheeler that in order to handle the ore and facilitate matters in general, it would be impractical to continue the incline service, so that perpendicular workings will be employed. The capabilities of the South Swansea mine have practically outgrown the present methods of hoisting, and doubtless the advent of the new shaft will witness many material surface changes.

BINGHAM'S BEN BUTLER.
Corporation Organized to Develop This West Mountain Property.

With a capital stock of \$50,000, in 10-cent shares, the Ben Butler Mining & Milling company was incorporated yesterday to develop the E. F. Butler mining claim and the Eighty-seven claim on a bond and lease, both being in West Mountain district. Henry Kohl is president; E. F. Butler, vice president; A. L. Jacobs, secretary and treasurer; and Martin McGrath, J. A. Jacobson, F. E. Wilson and V. P. Wells are the other directors.

CARBONATE HILL.
Shipment of Three Cars of Lead Ore From Morgan County.

Three cars of ore have arrived in the market from the Carbonate Hill mine, located near Payson, Morgan county. One of the directors of the company stated yesterday that the ore would run 35 per cent lead, 20 per cent iron, and other values in gold and silver. The company is building a new road from Peterson to the mine, and it is the intention to build a 1,200-foot tramway at an early date.

The mine is located at a point which makes it difficult to handle ore without the aid of a tramway.

CONFLICT AVERTED.
Illinois and Congor Agree On Boundary Lines.

For some time past there has been a controversy between the Illinois and the Congor Mining companies, who own properties in Bingham, over boundary lines. It was feared by the directors of the companies that there would be a conflict when this time came to secure patents for the ground. Happily, the difficulty has been averted and an agreement has been reached as to just where the side lines should be. The officers of the two companies met together and easily reached an amicable conclusion.

The Illinois company has sent a party of surveyors to the property in order to take the preliminary steps to secure a patent for its ground.

TO WORK THE HERCULES.
(Special Correspondence.)
The Hercules Mining company, in which James Hecney is the chief stockholder, will resume work on the property in the near future. The mine, which is known upon all mining maps of the Tintic district as the Phoenix mine, is said to have been worked since 1885. Almost since the formation of the company the property has been in litigation, which has only been settled within the last few months. Three cars of ore have arrived in the market from the Carbonate Hill mine, located near Payson, Morgan county. One of the directors of the company stated yesterday that the ore would run 35 per cent lead, 20 per cent iron, and other values in gold and silver. The company is building a new road from Peterson to the mine, and it is the intention to build a 1,200-foot tramway at an early date.

The mine is located at a point which makes it difficult to handle ore without the aid of a tramway.

CONFLICT AVERTED.
Illinois and Congor Agree On Boundary Lines.

For some time past there has been a controversy between the Illinois and the Congor Mining companies, who own properties in Bingham, over boundary lines. It was feared by the directors of the companies that there would be a conflict when this time came to secure patents for the ground. Happily, the difficulty has been averted and an agreement has been reached as to just where the side lines should be. The officers of the two companies met together and easily reached an amicable conclusion.

the mine on a tour of inspection, and is expected home today.

Encouraging reports continue to come from the Midnight Bowers. Stockbroker Sheets expects to leave tomorrow upon a business trip. A sixty-horse-power engine is to be used at the new hoist to be erected at the Bowers, in the West Dip.

S. E. Crager is preparing to take out a patent on the Nellie Harris and Last Chance mining claims, in the Tintic district.

Colonel Hecney of the Bingham Copper & Gold Mining company reports that the company has begun the sinking of a new incline.

The Taylor & Broughton sampling works reported five cars of ore from Mammoth, two from Kuroka and six from Felsco yesterday.

Dr. M. N. Graves of Ogden was in the city yesterday, attending to some mining business. The doctor represents some eastern capitalists who are looking for Utah mining investments.

The South Swansea was in the market yesterday with four cars of ore, which brought in returns of 35.3 per cent lead, 20 per cent iron and 35 ounces gold, which netted the company \$4,382.50.

The directors of the Sanbeur company held a meeting yesterday and passed a resolution to suspend work for the shaft 100 feet further in depth. When this contract is completed the shaft will be 100 feet deep.

A. S. Day, manager of the La Roche at Tintic, has returned from a trip of inspection to the property, and he reported that the mine was in good condition and that it could not look better. He has ten men employed at the mine.

A. J. Moore, a prominent citizen of Richfield, and who is heavily interested in the Tintic district, has returned from a trip of inspection to the property, and he reported that the mine was in good condition and that it could not look better. He has ten men employed at the mine.

Salt Lickers Buy Claim.
(Special Correspondence.)
Provo, April 21.—A mining deal was recorded today with the recorder of this county whereby a one-fourth interest in the Desert and Reservoir claims, Tintic district, was transferred from Jesse Barker, Charles Gale and L. C. and Anna Peterson of Ogden, to Bernard and Harry Rich of Salt Lake City; consideration, \$350.

The following notices of location were filed today:
The April Pool, in Camp Floyd district, by Tim Moriarty et al.
The Mark Twain Nos. 7, 8, 9, 10 and 11, by E. L. Hutchinson.

Wyoming Marble Quarry.
(Special Correspondence.)
Sundance, Wyo., April 21.—A fine marble quarry is being opened at Aberdeen, near this place. Petrified fish, crabs, etc., are found in a beautiful mottled onyx marble.

The company has organized to work these deposits, and now has a force developing the property. The owners believe they have the finest bed of onyx marble in the country. Already orders have been received which will keep the company busy for six months.

Sale of the York group at Bingham.
The sale of the York group at Bingham, which was announced in The Herald several days ago, has been fully consummated. The property was leased for a period of fourteen months by the former owners to J. S. Goss, Joe Higgins and E. W. Taylor. The lease had some time to run, and they were induced to cancel it upon the payment to them of \$1,000. The price paid by the purchasers of the property was \$25,000.

Dalton & Lark to Be Pumped.
The syndicate which recently secured an option on the Dalton & Lark is making preparations to put in a temporary pumping plant to drain the mine for the purpose of developing it. In connection with the report that the Dalton & Lark on the east, has been tied up by the same people who secured control of the former property, forces a conviction that the new syndicate means business.

Offer For Dyer Mine.
(Special to The Herald.)
New York, April 21.—A special dispatch from Boston to a New York paper says that Denver and Salt Lake capitalists, names not given, have made an offer for the old Dyer mine near Vernal, Utah. The majority of the stock of the old Dyer is held in New England.

Summit County Locations.
(Special Correspondence.)
Coeville, Utah, April 21.—Six location notices were filed today with the county recorder by Mr. H. M. Mechem et al., locating the Black Crow mines Nos. 1, 2, 3, 4, 5 and 6, situated in the upper Beaver canyon. They think they have a good thing, and will prosecute work with vigor.

Will Work Bonanza King.
(Special Correspondence.)
Ogden, April 21.—J. H. Carson and M. J. West, together with five other men, went north yesterday to work the Bonanza King mine, east of Logan, on Saddle Creek.

Ore and Bullion.
Ore and bullion amounting to \$29,522 was received in the city yesterday, as follows:
Wells, Fargo & Co., bullion, \$4,922.
T. H. Jones, bullion, \$9,000; ores, \$7,500.

Metal Market.
Silver, 50¢ per ounce.
Lead, \$4.10 per 100 pounds.
Copper, 16½¢ per pound.

Mining Notes.
L. E. Riter of the South Swansea is at

the mine on a tour of inspection, and is expected home today.

Encouraging reports continue to come from the Midnight Bowers. Stockbroker Sheets expects to leave tomorrow upon a business trip. A sixty-horse-power engine is to be used at the new hoist to be erected at the Bowers, in the West Dip.

DAY AMONG BROKERS

Northern Light Closed With An Upward Turn.

MANY SALES ON THE CURB

JOE BOWERS HARD TO GET AT SIXTEEN CENTS.

Opinion Prevails Northern Light Will Go Higher—Daisy Also Goes Up a Little—Eleven Thousand Antler Sold at One Cent—Raised An Eighth at the Close.

The Salt Lake exchange did a fairly good business yesterday. A total of 25,700 shares were sold during the call. The trading was done mostly in the cheaper stocks, and altogether aggregated \$2,218.48. One sale of Ajax was recorded. Daisy opened up weak, but closed strong, and was in strong demand at prices ranging above 20 cents. Northern Light opened at 73 cents, and the stock was wanted at prices above that figure. Strong bidding was done, and 75¢ was offered for the stock before the close, but very little was offered, even at that figure.

Only 600 shares of Showers Consolidated could be picked up at the prevailing prices, and Joe Bowers was hard to get at 16 cents.
